

Consulting Forensic Scientist

Human Identification Technologies, Inc. is currently recruiting for a qualified DNA analyst to assist in its consultation department. The opportunity will expose the forensic scientist to a wide array of DNA testing protocols from the U.S. and abroad. A flexible schedule is available and compensation is on a commission basis. Although initial orientation is required on-site in Redlands, CA, ongoing work can potentially be performed remotely. Duties include reviewing the work of DNA testing laboratories in criminal matters. Interested parties are encouraged to contact Mehul B. Anjaria at m.anjaria@hitdna.com.
