

# **Forensic Chemists – Develop Your Career in England**

## **Marks and Trace – Particulates – Fibres**

LGC Forensics is a dynamic organisation, committed to providing the justice system with the finest science, employing 500 dedicated staff and providing the full range of forensic science services from excellent laboratories throughout England.

Whether it's working on murders from London, Liverpool or Manchester, a house breaking in a thatched cottage in the Cotswolds or a cold case review of an historic case, LGC Forensics has an impressive reputation with UK Police Forces.

We currently employ scientists from around the world, each of them adding new scientific skills and knowledge to the organisation. We currently have vacancies for experienced forensic chemists with at least four years experience of working in one of the following areas:

- Fibres/Hairs
- Marks and Trace
- Particulates
- Glass
- Fires
- Accelerants
- Fires
- Trace Evidence

We offer the opportunity to complete science at a high level, development opportunities, competitive salaries and a flexible benefit package including a minimum of 25 days leave with the opportunity to purchase 5 more, plus 8 days public holiday giving you time to explore Europe.

We would love you to come and stay for ever but we can negotiate fixed term contracts of 2 to 5 years.

To find out more send your CV to [john.cameron@lgcforensics.com](mailto:john.cameron@lgcforensics.com) or telephone John at any time on +44 (0) 7594 568319 to find out more.
